Organization Overview:

STEM careers provide exciting opportunities for breaking the norm and offering upward mobility and economic security to women and minorities. At sySTEMic flow, we plan to supplement girls with access to prerequisite courses in their STEM track and connect them with other leaders in the field which will give our students the educational tools that will open doors to collegiate and employment opportunities in the STEM field. Our long-term impact is to increase STEM diversity and have women of color be the forefront leaders in these industries and improve economic opportunities for minority women.
