My name is Donelle, I would like to represent the student body as Vice President of Human Resources and Facilities. It is imperative that our student government invests in quality resources for you! Whether you follow the actions of this governing body or not, we should have your best interest in mind. Student government needs to advocate for all voices. If elected, I aim to make this process more accessible and transparent. I wish to see more students sharing their thoughts and suggestions, so SGA can improve the student experience. What matters to me is open communication, practical solutions, and working towards sustainable practices. Continuous upgrades to the quality of life at Bunker Hill can have long term effects on student outcomes. As Vice President of Human Resources and Facilities, my goal is to see the student population benefit from improved common spaces and access to additional resources.

One exciting aspect of this role is that members of SGA work with a coalition of community colleges at the state level. We have the potential to create lasting positive change for current and future college students across Massachusetts. By implementing policies to help students feel empowered on campus, the SGA has a real impact improving the lives of our peers. These incremental changes can directly translate to student graduation rates, future job opportunities, and increased income potential. Developing systems that support students now equates to more success later in life. If elected, part of my role will be to explore ways that physical conditions at Bunker Hill could be improved. I will propose improved study areas and additional food resources on campus. Clean, comfortable, and quiet spaces make studying on campus more effective. I want you to know where to find everything you need to prosper and how to ask if your needs are not being met.

Outside of school, I work full-time for a renewable energy company. Everyday I communicate between diverse groups to resolve problems. This skill would be a key part of my role as Vice President of Human Resources and Facilities. By clearly defining what we need, we can elect folks best suited to help the school grow. In the future, I hope to work on crafting inclusive and
sustainable policy for regulatory agencies, so this opportunity is something I deeply care about. In this position I will work to create the best experience possible for all students.

The Vice President of Human Resources and Facilities should seek to establish a partnership between school officials and the student body with open communication, transparency and objectivity. This is what the student body of Bunker Hill deserves. I would be honored to serve in this role as the point of contact between student needs and administration. As a member of the Student Government Association, I would do everything in my power to improve the quality and efficiency of our governing process, and to make our strategy more evident to students. Input from diverse sources helps the SGA know how to nurture student happiness and health, and that is top priority. If elected my goal would be to listen to what students are asking for and do my best to deliver.
