Sabeeha Khalid  
Position: President of Student Government Association  
Dear BHCC Students,

My name is Sabeeha Khalid. I have always been involved in leadership positions. I was the Secretary of the Student Government Association and current president of Muslim Student Association club. My major is medical assistance and also I want to pursue a career in Psychology. I am a member of Alpha Kappa Mu Honor Society. I am also a member of the Commonwealth Honor Society. I am compassionate about serving people. I would be honored to be President of the Student Government Association for Bunker Hill Community College which is the position I am running for.

When I came to BHCC, I had no experience of leadership and engagement work at all. I was quiet and I had a shy personality. However Bunker Hill Community College has exposed me to a lot of leadership opportunities which has let me grow and rise above all odds. For example, my communication skills have improved and my abilities to express myself as an individual has improved.

However I see a lot of people who don’t even know about these opportunities that are available to them on campus and are beneficial in many ways. So I think that the Student Government Association should spend more time promoting the Student Government Association to them. The Student Government Association should take time to also listen to students questions and concerns so the students know they will be represented well. I want to forge a strong bond with students so they can feel comfortable enough to voice their concerns and be part of the SGA community. The Student Government Association should advocate for the underrepresented students around Bunker Hill Community College. The SGA should play a role in really working with the student body to fix issues that are important.

Moreover, I have experience working in SGA and have learned how the organization works. I was part of the SGA who helped achieve the food pantry that has been helping students a lot. If I get elected I will not be taking too much time to understand the association and to figure out how to get things going and achieve the set goals.

We as a team had started many goals to achieve but the lack of timing never let us accomplish them. For instance, having a dollar menu on the vending machines, lower the cost of the food in the Cafeteria of the college. If I get elected I will advocate for these goals to be completed. In addition, I want the science classes to have more expanded timings. A lot of students live far from the college (at least an hour away) and it is hard to manage the schedule, sometimes they even will skip the class which is never beneficial for the students. Also I want the activities happening on the campus to be taken more seriously through the students that are running the clubs in officers positions.

Furthermore, one of my other goals that I want this position for is working with clubs. Most of the clubs are not well aware of their constitution. If I get elected we can spend time
together to help them be aware of their constitution so they are familiar with what possible events and activities they are capable of doing based on their budgets.

As Harold S. Geneen says “Practised not so much in words as in attitude and in actions.”

In order to accomplish all of these goals I need your love and support. Votes for me.

Thank You,

Sabeeha Khalid
