

President's Climate Commitment Committee

Agenda for January 15, 2008
Room E175
2:30-3:30

1. Acceptance of minutes of last meeting.
2. Acceptance of the three policies reviewed at last meeting.
3. Review and discussion of the policy on temperature variances.
4. Update and discussion on greenhouse gas emissions inventory.
5. Discuss creation of a website for the committee documents (we need a website or a public folder or both to document our accomplishments and to post each of the documents we create including the policies, the feature articles we published in the newsletter for reference and material we can use for our quarterly reports, the action plans, and reports we create. This information should not be in printed format for obvious reasons.). We also need a volunteer to coordinate and maintain this.
6. Create a list of features for the "Green Corner" (suggestions: What is the commitment? Creation of the committee and its role; Separate printing of each policy; Components of the action plans as we develop them e.g. recycle containers deployed on campus, website, awareness program, what people can do at home, etc.).
7. More details about college community engagement.
8. Miscellaneous items.

Request all members to bring suggestions for the feature articles for the Green Corner so we have a sufficient number of articles to publish while we work on the action plans.
