

Create a Voice Thread Account

Introduction

VoiceThread is an application that runs inside your web browser, so there is no software to download, install, or update. VoiceThread allows you to place collections of media like images, videos, documents, and presentations at the center of a conversation.

These conversations are not live; they take place whenever and wherever it is convenient for people to participate. A VoiceThread allows people to have conversations and to make comments using any mix of text, a microphone, a web cam, a telephone, or an uploaded audio file.

Sign in or Register

Step 1: Go to <http://voicethread.com/> and create your own VoiceThread account

Step 2: Click on the **Sign in or Register** tab.

Step 3: Complete the *Register a new account* information.
