

2019 Federal Poverty Guidelines Chart

HHS issues poverty guidelines for each household size. For example, the poverty level for a household of four is an annual income of \$25,750. To get the poverty level for larger families, add \$4,420 for each additional person in the household. For smaller families, subtract \$4,420 per person. Guidelines for Alaska and Hawaii are higher since it's more expensive to live there. The chart below calculates it for you.

Number of People in Household - 48 States

One	\$12,490
Two	\$16,910
Three	\$21,330
Four	\$25,750
Five	\$30,170
Six	\$34,590
Seven	\$39,010
Eight	\$43,430

For nine or more, add this amount for each additional person \$4,420

Agencies help families who earn more than the federal poverty level. For example, some programs offer subsidies to families that are 150% of the federal poverty level. For a household of four, that would be $1.5 \times \$25,750 = \$38,625$.
