EKG Technician Program

Become an Electrocardiograph Technician

EKG Technician Certification Program prepares students to function as EKG Technicians and to take the ASPT – Electrocardiograph (EKG) Technician exam and other National Certification Exams.

National Certification

After the successful completion of this program, students will be prepared to sit for the American Society of Phlebotomy Technicians, Inc. (ASPT) Certified EKG Technician (CET) exam.

EKG Technician Program
NON-856E

Total Hours: Course Contact Hours: 50

This course will include important practice and background information on anatomy and physiology of the heart, medical disease processes, medical terminology, medical ethics, legal aspects of patient contact, electrocardiography and stress testing. Additionally, students will practice with EKG equipment and perform hands on labs including introduction to the function and proper use of the EKG machine, the normal anatomy of the chest wall for proper lead placement, 12-lead placement and other clinical practices.

A hybrid version of this course is also offered. The hybrid option allows you to take the “classroom” portion remotely via pre-recorded and live webinar sessions. Students will be assigned to a clinical setting at a later date and upon completion of the training. Students who take an online course should be self-motivated to and have access to the internet. Upon registration, students will be mailed their materials. Students may begin the online course once as soon as they receive their course instructions by email. They can begin their course in advance of receiving their materials. The online portion of the course is approximately 180 hours and most students will complete their certification in 8-16 weeks. Labs will take place at a later date once the College resumes face-to-face classes or students will be assigned an externship placement.
